PROFESSIONAL SUMMARY

Computer Science and Engineering student graduating in 2027, with experience in cloud operations, network feasibility, and technical problem-solving. Interested in Product Management, product discovery, requirements analysis, feature prioritization, and user-focused solutions. Completed AI-native Product Management training and bring a technical foundation for data-informed decision-making.

EDUCATION

T. John Institute of Technology, Bengaluru — 2023–2027
B.E. in Computer Science and Engineering — CGPA: 8.45/10.0
Vijaya Bifurcated PU College, Bengaluru — 2021–2023
Pre-University Course (PUC)

SKILLS

Programming: Python, Java, C, JavaScript, SQL
Cloud: AWS, Azure, EC2, S3, IAM, VPC, RDS, Lambda, CloudWatch
Web and APIs: Flask, REST APIs, HTML, CSS
Data and ML: Pandas, NumPy, Matplotlib, Scikit-learn
Databases and Tools: SQLite, MySQL, Git, GitHub, VS Code, pytest
Networking: LAN, Routers, Switches, VLAN, Network Troubleshooting
Product Fundamentals: Product Discovery, User Problem Analysis, Competitor Research, Feature Prioritization, Product Requirements (coursework and self-directed learning)

EXPERIENCE

Cloud Trainee – Rapyder Cloud Solutions — Jun 2026–Aug 2026

- Gained exposure to AWS EC2, S3, IAM, VPC, RDS, Lambda, and CloudWatch, including cloud operations and monitoring.
- Reviewed logs and explored basic troubleshooting to understand technical issues and operational requirements.
- Learned how cloud reliability, resource management, and access control support business and customer needs.

Network Engineer Intern – Aspirare Communication Pvt. Ltd. — Mar 2026–May 2026

- Supported network feasibility assessments by collecting, verifying, and updating service-related information.
- Maintained Excel records and coordinated operational details to support team workflows and service decisions.
- Clarified feasibility details with relevant stakeholders and helped identify service constraints affecting delivery.

PROJECTS

Flora Recognition | GitHub

- Developed a plant-species classification project using Python, Pandas, NumPy, Matplotlib, and Scikit-learn.

Cloud Deployment Guard | GitHub

- Built a Python tool to inspect YAML deployment files for potential security, configuration, and reliability issues using PyYAML and pytest.

CodePulse | GitHub

- Developed a code-analysis tool to identify potential issues and report code health using Python, Flask, HTML, CSS, and pytest.

CERTIFICATIONS

- **Becoming an AI-native Product Manager** – Pendo Learning Lab, in collaboration with Mind the Product, Oct 2026. Verify Certificate
- Microsoft Azure Fundamentals; Microsoft Azure AI Fundamentals.
- Accenture Data Analytics and Visualization.
- Machine Learning Workshop – Innomatics Research Labs.
- Python Bootcamp – Xcel Corp.

ACTIVITIES & ACHIEVEMENTS

- Student Volunteer, Placement Cell – T. John Institute of Technology; Head Coordinator, QCFI.
- Achieved a perfect score in Mathematics III (M3) in the VTU external examination.
